COPYBOARD **BF-041** SERIES

SIMPLE OPERATION

Record your ideas without pausing your train of thought.

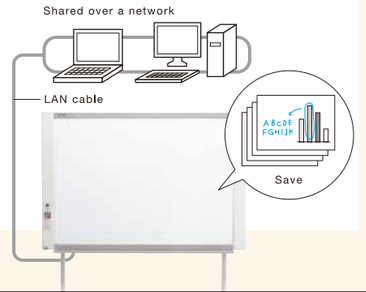
Meetings are a meeting of minds – a place where everybody puts their heads together and great ideas are born.
You don't want a complicated machine that will stop the flow of ideas.
You want an easy-to-use tool that will work as quickly as your mind does.
Enter the new series of Copyboards from PLUS. PLUS is the company that first brought you the Copyboard, and PLUS has been working constantly since then, developing ever better products for you.
Here are the latest and greatest in creative meeting tools.

Network Function

**No need for notepads or USB memory sticks!
Just write your ideas on the Copyboard and share them over a network.**

The board is accessible via a web browser

Scan and save up to 100 pages to the Copyboard's internal web server. No need to export data to a computer or memory stick. Just plug in a LAN cable and you'll be able to share your meeting minutes. You can even chose from a variety of network settings to password-protect sensitive information.



No note taking enables you to have a productive meeting

The best ideas come when everyone can concentrate on the discussion, without being distracted by taking notes. Now everyone can view the meeting notes at anytime over the network. No more getting out a memo pad or USB memory stick—everyone is free to give the meeting their full attention.

Secure your information

Worried about papers or USB memory sticks falling into the wrong hands? By viewing your meeting minutes over the network, you can protect sensitive information and make sure that it is only seen by the appropriate individuals.

Slim and light

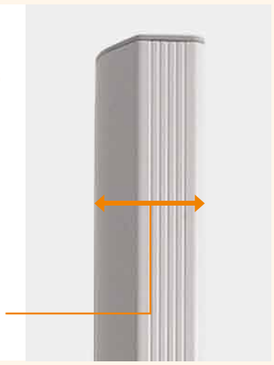
Don’t bring your meeting to the Copyboard, bring your Copyboard to the meeting. This new Copyboard is easy to move to the location of your choice.

Sliding sheet

When you run out of space, just slide the sheet with your hand and make more room. Carry on your writing without interrupting the flow of ideas.

40% thinner than previous boards

The PLUS N-20 Copyboard’s slim design (only 72mm/2.8" thick) makes it easier to move around compared to other bulky boards.



Light enough for anybody to move

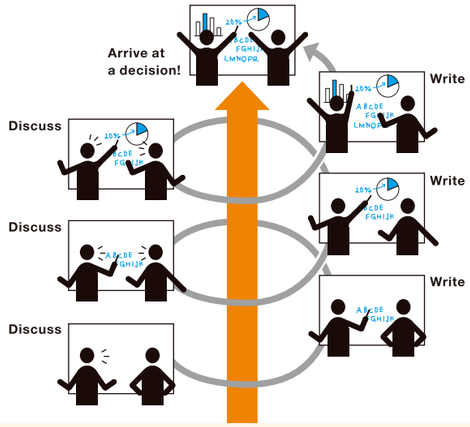
The board is also 22% lighter than previous boards, making it easy to move.

Easier to scroll... and you can scroll in either direction

You can scroll the sheet forward or backward with the touch of a hand. No more No more pausing your train of thought when you run out of space or need to see what you’ve written on the other side of the sheet.

Discussion + writing = synergy

Writing is an invaluable element of dynamic discussions. Visual brainstorming allows you to organize your ideas, make connections and reinforces memories. The best discussions happen when everyone is giving their full attention, and with this new Copyboard everyone can do just that. And now you can be confident in the knowledge that everything you write is being saved for easy reference later.



Make every stage of your meeting stress-free

From pre-meeting preparations to post-meeting follow-ups, PLUS Copyboards make it easy. The boards have a wealth of functions that improve the speed and quality of your meetings at every step along the way.

Setup

○Anywhere you choose !

The board is 40% thinner than previous models, and the legs have been designed to take up minimal space.

○Easy to move

20% lighter than previous models, making it easy for anybody to move.

Other Features

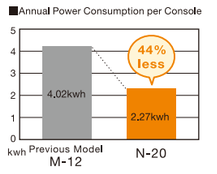
○No special software

The board is accessible via a web browser and all board settings (file format, date settings, resolution etc.) and security settings can be configured in a browser on your computer. You don't need to install special software. The board is compatible with all operating systems.

＊The settings can also be changed using the board's control panel.

○Save energy

Previous boards have used 40W during operation and 5W during stand—by. The new series from PLUS uses only 12W during operation and 3W during stand-by. You won't find a more energy—efficient board than this!



＊Measurement conditions: Used at three one-hour meetings per day. Two screens were scanned at each meeting.
The standard "S" model was used.

Write

○Smooth-sliding sheet for uninterrupted discussions

Slide the sheet with your hand to make more room to write without interrupting your discussions.

○Magnet-attachable surface

Use magnets to stick drawings and the like onto the board. (This is the first sheet-type Copyboard with this function.)

○Attach other items

Need a timer or calculator? Stick it to the frame of the board! You can stick a magnetic sheet (optional) to the frame side, thereby customizing the board to suit your needs. (This is the first sheet-type Copyboard with this function.)

Scan

○One-touch operation

Simple—designed control panel allows you to operate it intuitively.

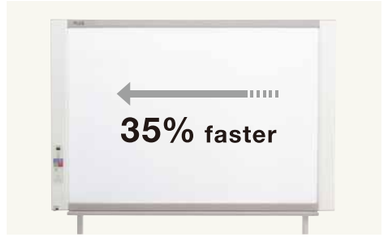
○Quieter

The scan noise has been reduced from 50dB to 43dB. No more noisy scanning disrupting your discussion or train of thought.

＊As a point of reference, a quiet office is 50dB and the average library is 40dB.

○Faster scan time

Color scanning now takes only 15 seconds—35% faster than previous models.



○Erase reminder function

You can set the Copyboard to scroll through the sheet when you turn it off—no more forgetting to erase.

＊This feature is set to "off" as the factory default.

Save

○Network function- no hard drive necessary !

The board is accessible via a web browser—no need for a USB memory stick or a direct PC connection to save the information. You can now simply view your information over a network.

○Save directly to your computer

With a USB cable connection, save your information straight to your computer. No special software is needed, the board is compatible with all operating systems, and only one page of data is saved for added security. When you remove the USB cable, your data will be automatically erased from the board's memory.

○Front-facing USB port

The USB port is front-facing making it easy to insert your USB memory stick. At a glance you can see which way to insert the USB memory stick. A 1GB memory stick will hold around 4800 pages.

○3 file formats

Save in PNG, JPEG or PDF formats. View the file on your computer, attach it to an email or paste it into a document.

PNG JPEG PDF

○Security functions

Configure the security settings in the browser. You can disable the ability to save to a USB drive as well as disable the transferring of image files to a computer.

Print

○Detailed print format settings

The browser enables easy configuration of settings such as paper size and date and even allows you to add a header or footer.

＊This can also be done using the control panel if the board is not connected to a network.

○Disable color printing

You can disable color printing mode if black and white only is preferred.

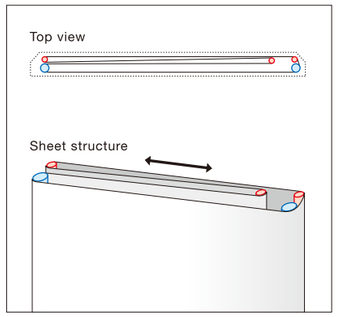
COPYBOARD
N-204
SERIES

4-Panel Type

The board has a sheet size equivalent to 4 writing panels—enough space to hold all of the ideas generated during an active meeting.
No need to stop and erase; Just keep on writing!

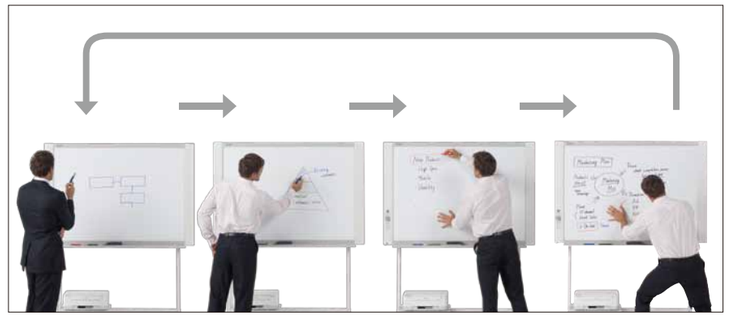
4 panels of writing space

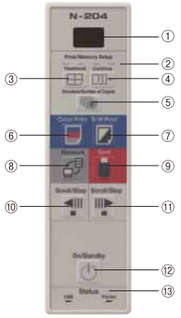
As shown in the illustration, the sheet is stored in a loop formation, with 4 panels of writing space! Move the sheet forward or backward with a touch of your hand—you won't run out of space!



Plenty of space for long meetings

Long meetings result in a lot of information, and PLUS has made it easier to record it all.
No more stopping to save and erase—keep everything and go back to what you wrote earlier with a single touch. You can even shrink your 4 writing panels of information to a thumbnail image and print it all on one page.





A simpler control panel

The simple-designed control panel allows you to operate the board intuitively.

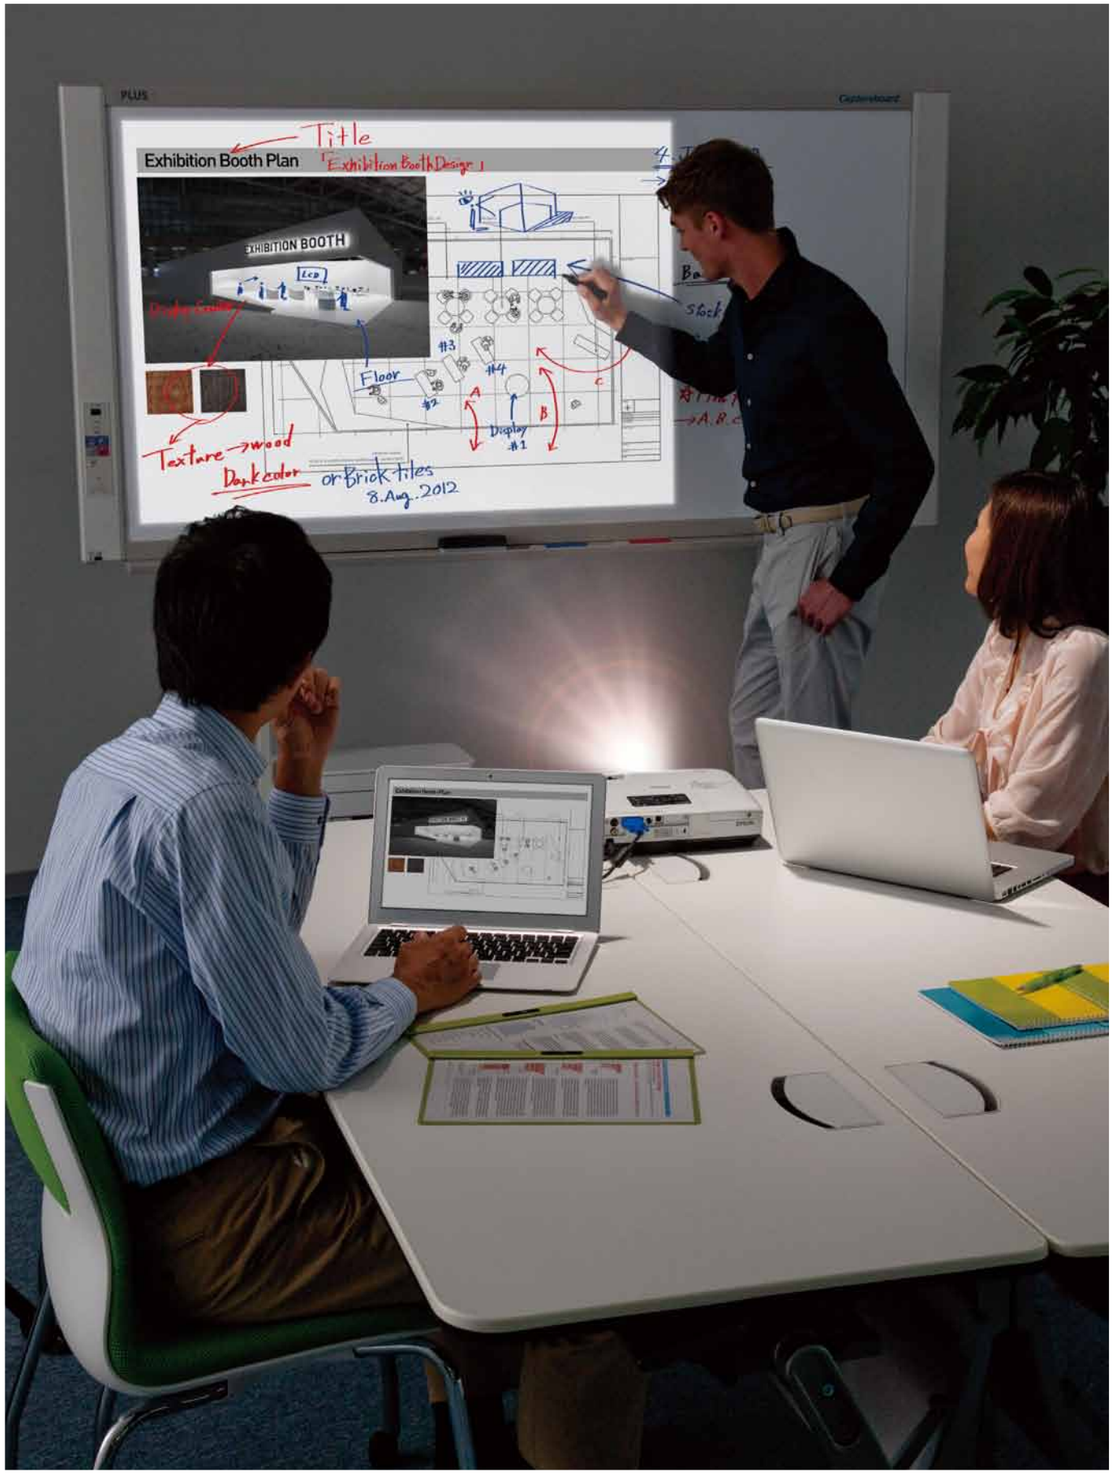
CAPTUREBOARD
C-20
SERIES

Captureboard

Use the markers to add comments to the projected image, then save the whole thing as an image file. The perfect way to annotate pictures or presentations.
And of course you can use the C-20 as a standard Copyboard too!

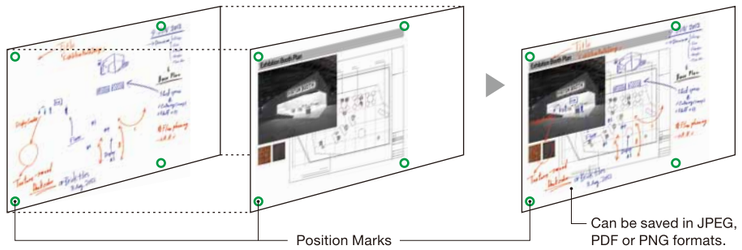


STEP 1 Project & write

Project an image onto the board and make annotations.

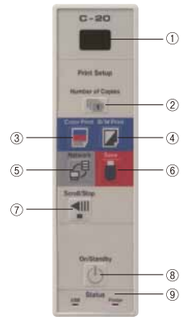
STEP 2 Combine and save

Using a marker, trace the ○ marks in the four corners to fix the position of the projected image. Click “Combine” on your computer. The projected image and your annotations will be saved together in a single image file.
*Combining software is only compatible with Windows.



STEP 3 Export

Send the saved image via email or print it out from the on-board printer.
*Requires the installation of a printer driver.



A simpler control panel

The simple-designed control panel allows you to operate the board intuitively.

①Display Window
②Number of Copies
③Color Print button
④Monochrome Print button
⑤Network button

CREATIVEPANEL
CR-5
SERIES

Compact Model for Individuals and Small Groups

A compact, light and ultra-slim Copyboard perfect to keep by your desk or in small meeting areas.
Ideal for brainstorming alone or in small groups.

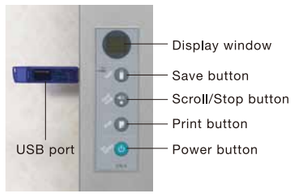
CASE 1 Working in a team

Often words aren't enough to get your ideas across. Don't let that stop you! With the CR-5 you can create a visual representation of your ideas. When you're done, make a print and use it as a reference. This saves your teammates from taking notes, allowing them to give their full attention to the meeting.

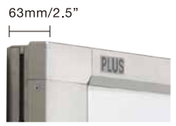
CASE 2 Working with your manager

When you're just talking, things can be unclear and vital information can be forgotten.
By writing out important information on the CR-5, you can share information visually and avoid mistakes. You can also send information directly by email–perfect for multi-department projects.

Simple control panel



Ultra-slim – just 63mm/2.5”



Print out your notes!

CR-5 SERIES

・CR-5 with optional stand (vertical)

・CR-5 with optional stand and printer (horizontal)

・Wall-mount configuration

The sheet maintenance
In order to keep quality of the sheet, please wipe the sheet with a water-damp cloth regularly.

[Main Features]

- ○Width of the board : 1000mm/40"
- ●Stylish and Compact design
- ○Number of Panels : 2 panels
- ●Hand–scrollable sheet
- ○Save to USB memory stick (Color inkjet printer is connectable)
- ○Save to a computer
- ○Security

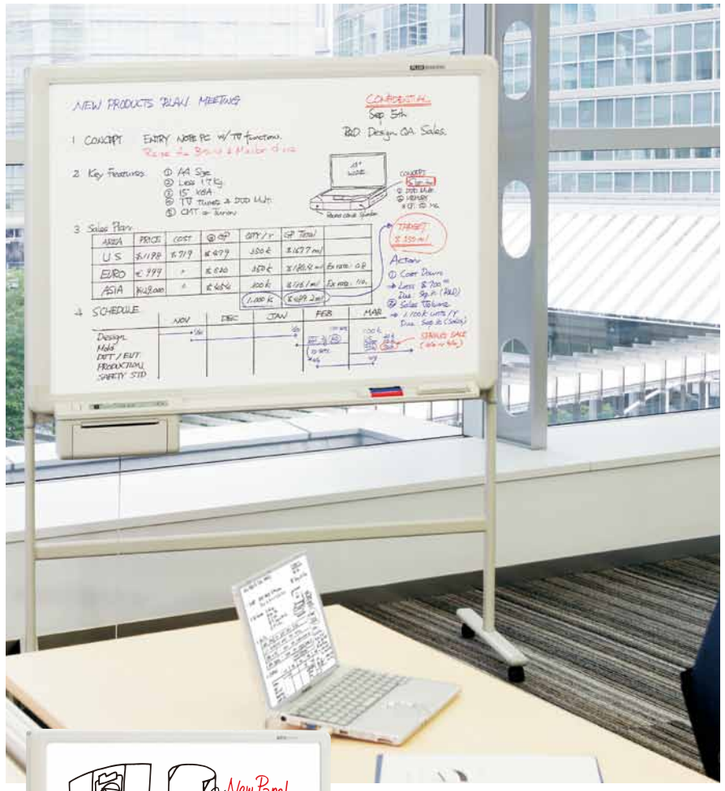
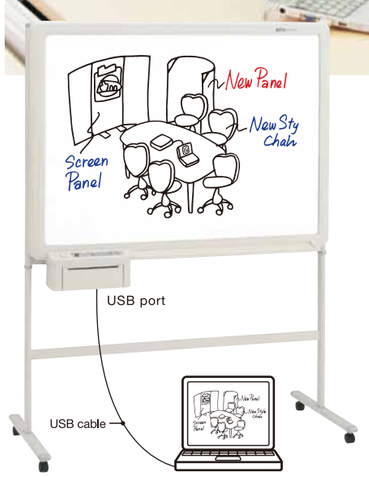
  Disable to save to computer

COPYBOARD
BF-041
SERIES

Black and White Thermal Printer Model

An easy-to-use model with a built-in thermal-paper printer.
Connects to your computer with a USB cable.





Easy to connect to your computer

With a standard USB port, connecting the Copyboard to your computer is now even easier.

Convenient sliding sheet

As with the N series, you can move the sheet by sliding it with your hand. Move the sheet easily and instantaneously to make more room to write or to see what you wrote on the backside of the sheet.

BF-041 SERIES

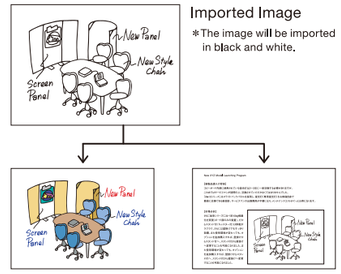
[Main Features]

- ○Width of the board : 1800mm/72", 1300mm/52"
- ●All in one type
- ○Number of Panels : 2 panels
- ●Hand–scrollable sheet
- ●Built-in thermal printer
- ○Save to computer

The sheet maintenance
In order to keep quality of the sheet, please wipe the sheet with a water-damp cloth regularly.

Comes with a TWAIN-compatible driver

Turn what you've written into an image file and import it to your computer using the included software.
Save in PNG, BMP, JPEG or TIFF format.



■Operating environments of the BF-041 software

Supported computer	IBM PC / AT or completely compatible machines
CPU	1.2 GHz or greater
Memory	64 MB or greater (128 MB or greater is recommended)
Free hard disk space	40 MB or greater
Interface	USB 1.1 or USB 2.0
Supported OS	Windows XP (Home Edition / Professional Edition Service Pack or later) / Windows Vista (32 bit) / Windows 7 (32 / 64 bit)
